Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,3-6,8-11,13,15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Bukosky et al (6,745,325).

3. Bukosky discloses a rear view mirror assembly comprising a mirror housing (10) adapted for mounting on a vehicle body; a mirror mounted to face rearwardly (figs 1-2) on the vehicle body; and a turn indicator light and a separate position light mounted to face forwardly of the vehicle body. (53, 30,80,61); said position light is kept OFF while said turn indicator light is flashing OFF and ON for direction indication (pp 5, Para. 0036 final 8 lines); said mirror housing includes a first lens for covering said turn indicator light for enabling illumination there through (figs 1-3, 80); said mirror housing includes a second lens for covering said position light for enabling illumination there through (51,53); a base member for mounting the turn indicator light and the separate position light within the mirror housing (42), the base includes a wall surface disposed between the turn indicator light and the separate position light, said wall surface forming a reflector surface reflecting light from the turn indicator light forwardly(71,fig 7); at least

one lens is provided for covering said turn indicator light and the separate position light, and further including a sealing member(81,40) operatively mounted between the mirror housing and the at least one lens for providing a water tight closure.

- A mirror housing having a forward surface and a rearward surface, a mirror mounted relative to said rearward surface of the mirror housing for viewing in a rearward direction; and a turn indicator light and a separate position light mounted relative to said forward surface of the mirror housing for selectively providing illumination in a forward direction (figs 1-2).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 7,12,14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bukosky et al.

6. Bukosky discloses the claimed invention except for the recitation a light body of said turn indicator light is a filament light bulb. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a filament light bulb as a light source in the device of Bukosky since it is old and well know to use filament light bulbs in vehicular lights for the purpose of using a light source that is cost effective (see cited prior art other than Bukosky for teaching)

7. With regards to the subject matter in claims 7 and 14 Bukosky's teaching on these limitations are found in pp5, paragraph 0036).
